WHO WE ARE — PROVEN IN PRODUCTION

Receipts, not promises.

EaseHawk Technologies is a global AI transformation company headquartered in Gurugram, India, delivering across the GCC, India, North America, the UK and APAC since 2022. We build production systems for governments, conglomerates and category leaders — and we run our own AI product platform, MoxSuite, so we build with AI the way operators do, not the way consultants describe it.

Every capability in this profile is backed by named clients, shipped systems and real durations. No aspirational service lists — just work that exists.
